## How Benefits are Determined

The maximum dollar amount determined as payable for a particular covered service and on which benefits are calculated are based on the allowed amount that is payable to a covered person by a health plan. This can generally be found on the Explanation of Benefits (EOB) issued by a health plan and is typically less than the provider's actual billed charge. In the absence of health coverage or if an EOB is not available, the amount that will be payable under this plan will be 50% of the provider's billed charges.
